

# Music and Speech Technical stuff ...

## SPEECH & THE MICROPHONE

“Mic technique”, as it’s known, is learnt and not natural. Most of your guests will have little or no experience, although, the “technique” is simple.

\* Get as close to (and stay as close to) the mic as possible.

If your even a short distance away, the volume the mic gets is much reduced.

Remember the mic can only amplify “what it hears”. If it hears a voice from a distance, it will be weak to start with.
